Strohm belongs to the Swiss holding company Heritage B and is the Group brand for integral bathroom solutions, with a holistic approach to bathroom spaces that goes well beyond the sum of the various units.

Strohm boasts more than 100 years of experience in the industry, along with a solid reputation for quality products manufactured in our plants in Spain, China and Hungary.

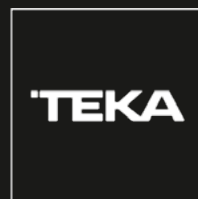

Design, sustainability, innovation and technology are the cornerstones of a brand concept aimed at enhancing the role of bathrooms within every home.

Strohm provides state-of-the-art bathroom solutions: taps, shower systems, vanity units, lights, basins, screens, bathtubs, mirrors, toilets, bidets and bathroom accessories, all adapted to needs and lifestyles of our customers.

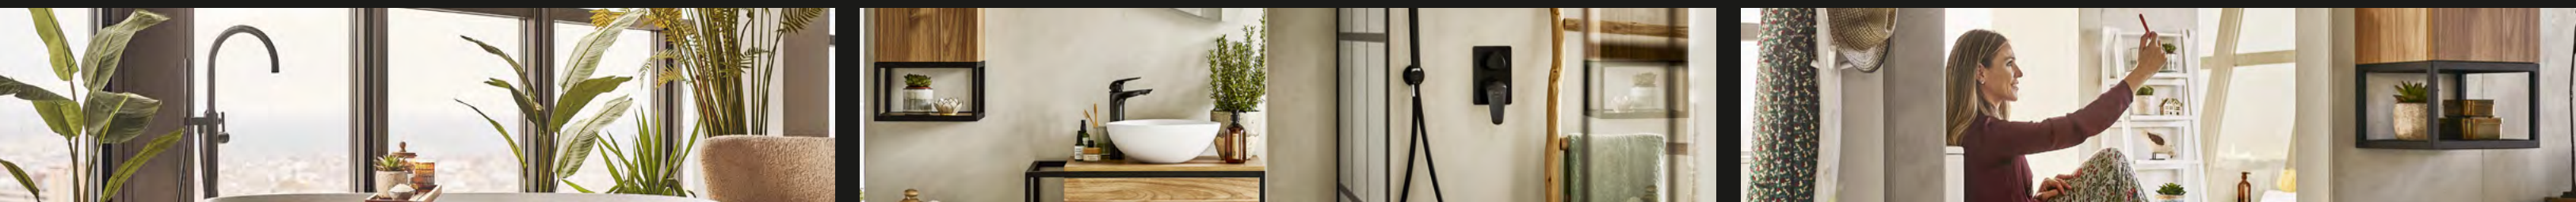

Our customers and their preferences for relaxation, comfort and intimacy are the core of everything we do at Strohm.

STROHM

Inspiring bathrooms

STROHM: INSPIRING BATHROOMS FOR NOW AND THE FUTURE.

OUR HISTORY

1900

Casa Buades

Originally founded under the name of Casa Buades, the company was exclusively dedicated to making taps.

1989

Teka Group

Teka Group acquired Casa Buades in order to broaden its business line.
This business unit specialised in the manufacture of kitchen and bathroom taps.

1994

Acquisition of Mofém

Teka acquired MOFÉM, the leading company in the Hungarian market, dedicated to the manufacture of bathroom products and industrial valves.

Factory in China

Kaiping Teka Faucets is established in China to manufacture taps, bringing our products to other continents.

Creation of Strohm Teka

At the ISH Trade Fair in Frankfurt, Strohm Teka was presented as the global bathroom solutions brand.

A new milestone

Strohm becomes independent, along with its Mófem brands and its Kaiping Teka Faucets plant.
It opens its first showroom in Madrid and sets up its main offices in this city.

New site

Strohm opens its own showroom in Budapest.
A space devoted to the end user.

R & D AND QUALITY

We are continuously in pursuit of efficient solutions designed to improve the quality of life of bathroom users, by creating innovative and safe bathroom products.

Our quality control process begins with our brainstorming and design sessions to take every detail into consideration, from user experience and the design of every component through to the selection of materials and highest quality suppliers.

Strohm products undergo a strict internal quality control process in our own laboratories as well as by external quality certification entities such as AENOR in Spain and NF in France.

Our factories and processes are ISO 9001 certified and continuously being reviewed to ensure that every product and process meets the highest standard of excellence. Our goal as a brand is to create inspiring products that enhance the lives of our users, with health and safety at the forefront of all our work.

MAIN FEATURES OF OUR TAP SETS

Safe Touch System

This safety system adds extra comfort to daily tap use thanks to a plastic part built into the main body of the tap designed to prevent high temperatures from transferring to the metal, thus avoiding scalding.

VIDEO

Easy Fix System

Installing a tap has never been easier. Easy Fix taps can be installed without using tools, thanks to its screw mechanism that reduces installation time by 60%.

Super eco: This product saves water. It uses under 5 litres per minute.

Noise reducer: The bath-shower and shower mixer taps have built-in noise reducers, sustainably reducing the sound of water running through the tap.

Environmental commitment: This product has been made with 80% sustainable materials. Less water and energy have been used in its manufacturing process.

Easy installation: Installation does not require additional works.

PVD: Metal coating available in a wide range of colours that is highly resistant to abrasion and chemicals.

Anti-fingerprint system: A special coating that is applied post-PVD to avoid fingerprints from marking the taps. Available for products with PVD treatment in black, rose gold and bronze.

MULTIBOX

Multifunctionality

A concealed system for built-in bathroom solutions: double shower system, added bathtub outlet, side showers...

Safety and comfort

This concealed system helps to reduce scalding due to hot water running through pipes. The noise reduction pieces significantly reduce the sound of running water.

Looks better and saves space

A more homogeneous surface on the wall looks better and makes better use of bathroom space.

Easy to use

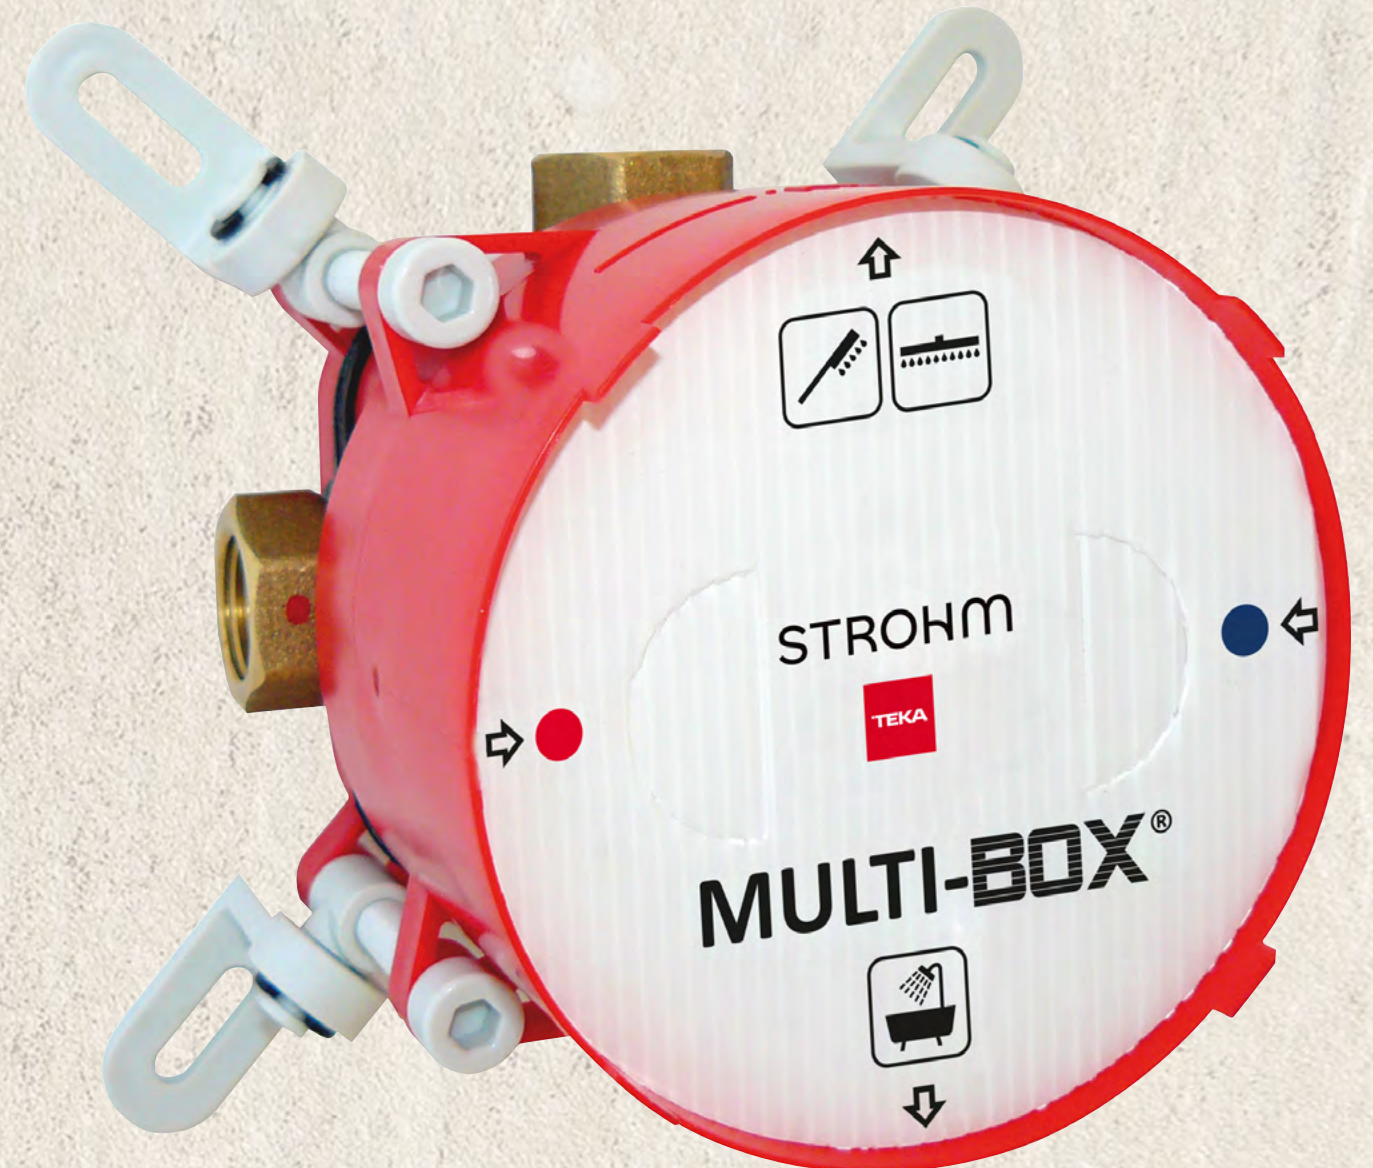

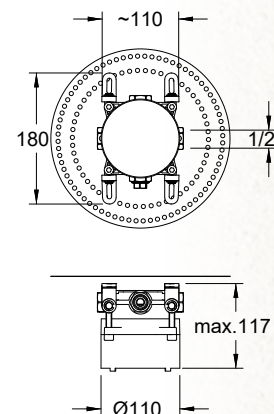

All controls are on a single panel (temperature, flow regulators, inverter...).

Easy to clean

A solution that saves space in the shower and bath also means that there is less surface area to clean.

A single concealed body for many models, making installation easier

Its independent adjustable legs means that the box can be installed in both flat and irregular surfaces. Once installed, the front of the Multi-box can be adjusted using the 4 adjustment screws. Easy to install thanks to the adjustable tabs and the 27 mm installation range in the box.

HEALTHY CLEAN WATER FROM START TO FINISH

Healthy, a clean and silent shower that improves your quality of life.

Healthy
0% bacteria
0% dripping
100% health

The new Healthy thermostatic shower by Strohm cares for your health and that of your family. Thanks to the automatic release of the water retained in the shower column set, Healthy guarantees total sanitation of the ducts, as well as eliminating any possibility of dripping and annoying noises once the tap is turned off.

Healthy is responsible for eliminating the risk of bacteria generation due to water stagnation, protecting your skin and providing a safe and pleasant shower experience.

Anti-bacterial

Helping to prevent diseases with drain water technology after each use.

Scalding prevention

All our thermostatic mixers are fitted with a 38° C temperature stop. This device prevents unwanted temperature variations, thus reducing the risk of burns.

THERMOSTATIC

SAFETY, COMFORT AND PRECISION

What is a thermostatic mixer?

It is a water mixer that automatically keeps the water temperature constant within the selected range even in the event of temperature or flow fluctuations.

How does it work?

The Strohmer Thermostatic Mixer automatically mixes hot and cold water. All you have to do is select the desired temperature with the temperature regulator, which will be reached by the water flow in just a few seconds and kept constant throughout your shower.

What are the advantages of this mixer?

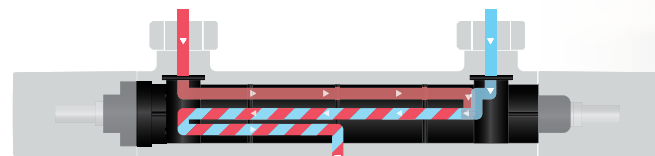

The Strohmer Thermostatic Mixer ensures maximum user comfort and safety, as well as saving 50% energy and water consumption.

AIR CHAMBER / SAFE TOUCH CASING WATER FLOW THERMOSTATIC MIXER

Safe Touch Technology

Internal ABS device that creates an internal pocket of air preventing high temperatures from being transferred to the outer metal casing.

Ensures maximum comfort and safety as well as saving 50% energy and water consumption.

Environment-friendly

Thermostatic Mixers help to save water and energy, thus protecting the environment.

Scalding prevention

All our thermostatic mixers are fitted with a 38° C temperature stop. This device prevents unwanted temperature variations, thus reducing the risk of burns.

DUAL CONTROL

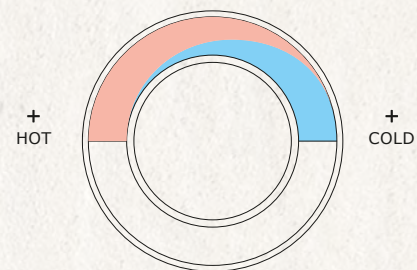

THERMOSTATIC DESIGN

WITH SINGLE LEVER MIXER

FUNCTIONALITY

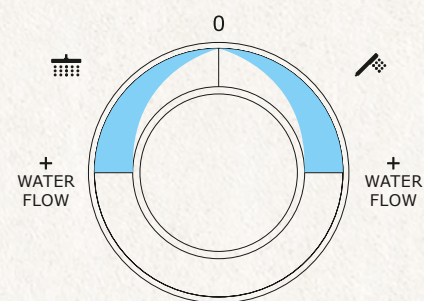

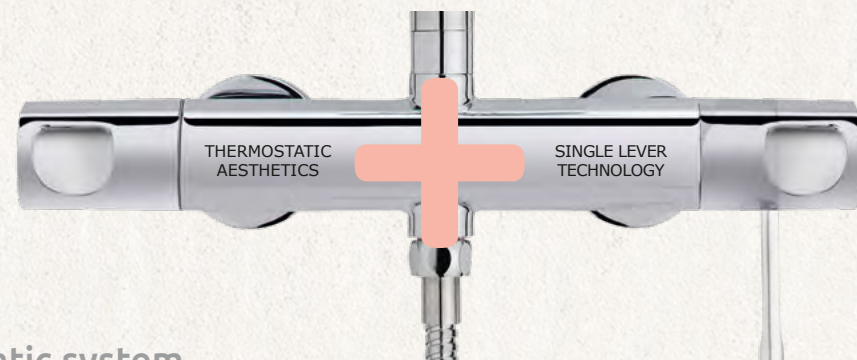

The Strohm Dual Control shower system blends the aesthetics of thermostatic taps with the practicality of a standard single lever. An elegant product that does not require maintenance.

The 180°, Soller, Manacor, Inca and Healthy collections boast this new technology, along with the Safe Touch technology in the Soller and Manacor collections, which prevent hot water temperature from heating the metal body of the tap, thus preventing scalding and making it ideal for use by children and the elderly.

Temperature Control

The right side of this single lever mixer regulates temperature. Turn to the right/left to achieve desired water temperature.

Left lever has a double function: Selection of water outflow (showerhead or hand-shower) and Flow regulation.

DUAL CONTROL

Soller Dual Control Shower System

SINGLE LEVER

DESIGN AND SIMPLICITY

Water saving technology that is simple to install

The classical shower system with a twist.
Fitted with user-adjustable rails, an antiscald system for easy
cleaning and a range of designs to suit every customer,
as well as water-saving features in most models.

DIY installation
You can install this product by yourself.

Water saving
If your water pressure is too high, we
recommend installing the automatic
flow control valve, which enables you
to save water every time you take a
shower.

CERAMIC TOILETS AND BASINS

Ceramic has always played a key role in the history of mankind. At Strohm Teka we have molded this timeless material to suit every taste.

Soft close

No need to remember to close the toilet seat. A gentle push of the lid after use will close it gently and silently.

Saving water

We are committed to our planet by saving water. Products with these icons reduce water consumption.

Rimless design

Our rimless toilet bowls simplify cleaning and maintenance.

Dual System: wall or floor

Strohm Teka toilets work for both wall and floor downpipes.

Easy to clean

The high quality white ceramic with double enable coating for greater resistance makes our products easier to clean.

SHOWER TRAYS

The Strohm Teka extra-flat shower trays are made in Spain using an innovative state-of-the-art blend of the highest quality cross-linked polymers and minerals.

The **Gel-Coat PREMIUM** coating vastly improves current standards, providing an exceptional non-slip surface that makes Teka Strohm shower trays one of the safest in the market.

Improved resistance to pitting corrosion in chloride environments.
Extra Safety, Extra Care.

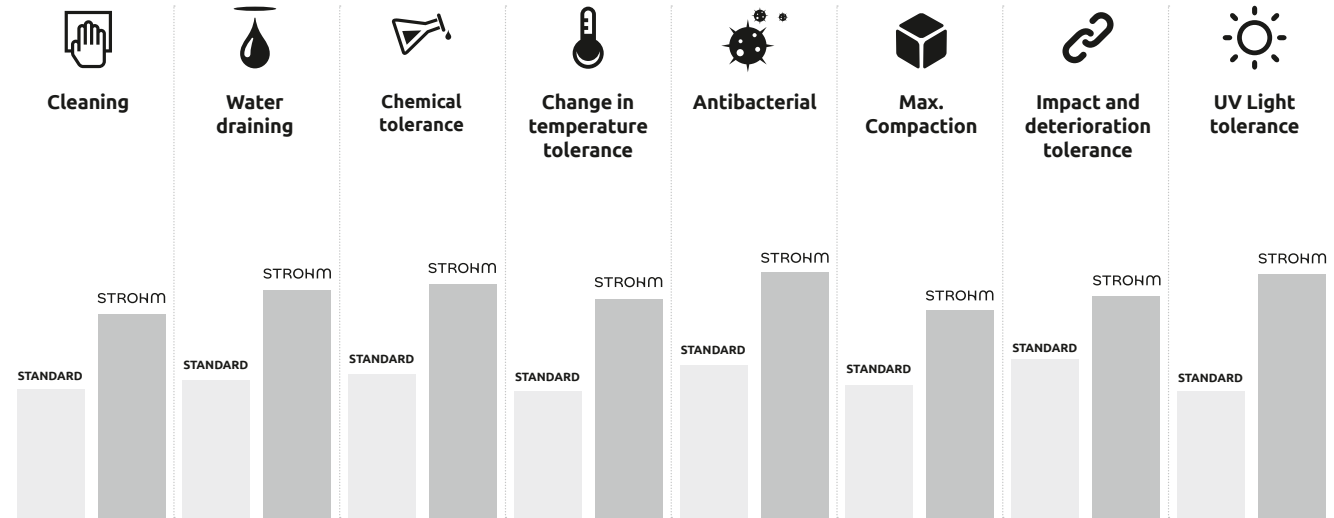

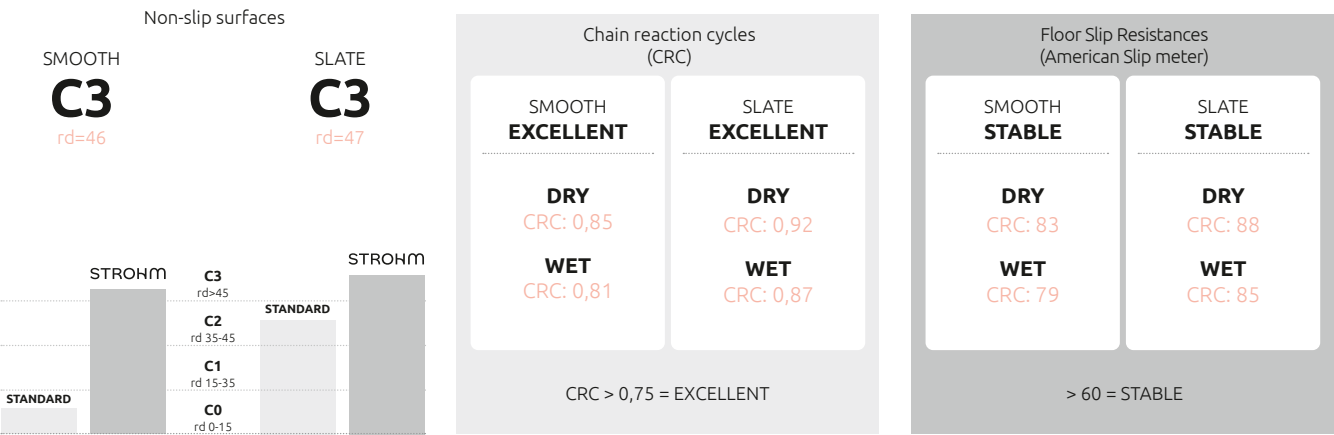

POLISHED STEEL GRIDS AISI 316:

At Strohm Teka we take care of every last detail to ensure a safe and pleasant shower experience. The grids of our shower trays are made of the highest quality **stainless steel (AISI 316)** which increases the resistance to general corrosion and high temperatures.

This material, commonly known as 'surgical steel', is used in the medical and pharmaceutical industries for its unparallel safety and corrosion resistance.

TERMS AND CONDITIONS OF SALE

Strohm Bathroom Solutions S.A. (hereinafter **"Strohm"**) wants to inform you that we have general terms and conditions (hereinafter the "General Conditions") that have the express purpose of regulating the conditions which are applicable in all contracting processes carried out by the users and readers of this catalogue of products and services offered by Strohm.

The General Conditions can be accessed by means of the following web link:
www.strohm-teka.com

These General Conditions shall remain in force and shall be valid for as long as they are accessible through the mentioned link, without prejudice to the fact that Strohm reserves the right to modify, without prior notice the General Conditions and any legal texts that are exposed in the present catalogue or in its web pages. In any case, access to the website after its modification, inclusion and / or replacement, implies acceptance of them by the any buyer or user of Strohm products.

The buyer, user, client is subject to the General Conditions in force whenever entering into any contract or agreement. It is not possible to enter into a contract or agreement with regards to any product and / or service without the prior acceptance of the General Conditions and where appropriate the particular conditions governing the provision of certain services which are agreed between the parties involved.

The General Conditions are always valid when they are published and when their consulting is possible by means of the abovementioned link. If they are partially or totally modified any new general conditions will be applicable as of the moment they are available to the buyer, user or client.

ACCEPTANCE OF CONDITIONS: All orders received imply the formal acceptance of the General Conditions, unless others were agreed otherwise in writing.

DESIGNS: Our models and pictures contained in this catalogue or in any of our marketing and publicity content which are shown and on display are for illustration purposes only. The actual product which will be sold may vary in color or size.

GUARANTEE: For cases where the Product or Products purchased present a lack of conformity because they do not correspond to the characteristics offered, present defects that prevent their normal use in accordance with their nature, or do not offer the services described for it, Strohm offers a 5-year guarantee for chromed or PVD single lever mixers, Dual Control or taps.

EXCEPTIONS: Painted surfaces: 3 years.

Shower accessories (Ex.: hand showers, showerheads, shower arms...): 3 years

Thermostatic mixers: 3 years

Electronic mixers/taps: 3 years

Vanity Units: 3 years

Mirrors and lamps: 3 years

Ceramic/mineral basins: 3 years

WC and bidet: 3 years warranty (ceramic: 3 years, seat: 3 years, flush valve: 3 years)

Concealed cisterns: 3 years

Shower trays: 3 years

Shower enclosures: 3 years

***Please check in each local market if some extension guarantee is applicable.**

The rights offered by this guarantee are subject to the bill of sale and the guarantee card that accompanies every model.

For this guarantee to be valid, the defect's acceptance by our Quality Department is necessary in each case.

Our guarantee only covers the replacement, free of charge, and in no case are we to be held responsible for the damages directly or indirectly caused by its defect.

Loose parts or parts that were chromed, painted or treated, and that were cleaned using aggressive products, or stained by inappropriate substances, are not covered by our guarantee.
